# One-Stop Mobile Accessories

One-Stop Mobile Accessories - A new mobile accessories store in the city has introduced exciting combo offers on their products, offering 20% discount on purchasing combos worth 2000 and above. Since One-Stop Mobile Accessories gets numerous bookings, they want to automate their bill payment as processing them manually takes an enormous amount of time. Help them design a web page and to calculate the ticket charge for a customer. On submitting the details, the message has to be displayed on the same page as shown in the screen shots below.

Plain web page:

Web page after giving inputs (inclusive of offer selection) and clicking on PLACE ORDER button :

Note: Fill in the style tag so as to have the given styles applied to the components. (Do not use Inline CSS) |

3	Use JavaScript for displaying the ticket price details.	Use JavaScript for displaying the price details: When the valid values are entered and the submit button is clicked, the ticket price should be displayed as follows: When the combo is/are selected, result should be displayed as : "Order has been placed successfully. You are requested to pay Rs.*<price>* on delivery." in a div tag with id as "result". The function must apply 20% discount on purchase, if the total price is 2000 and above.Otherwise, result should be displayed as : "No selection has been made." in a div tag with id as "result". **Note:** ➢ Use Math.round() to get rounded values ➢ Use the getElementById() / getElementsByName() function to retrieve the values. ➢ In Javascript, Please do not use "let". Instead, use "var".
4	Submit component with attribute onclick	Make sure that the onclick attribute of the submit component invokes the JavaScript function as"**return costCalculation()**". Also ensure that "return false;" statement is the last line of the JavaScript function **"costCalculation()".**
